## 3. Configuration

### 3.1 SOFTWARE CONFIGURATION

CCQAS was developed using the Sybase product PowerBuilder 6.0. All COTS software has been vendor certified as Y2K compliant. Documentation for the following products is included in appendix

- PowerBuilder 6.0
- Sybase Adaptive Server Anywhere 6.0 (formerly SQL Anywhere)  
Sybase Adaptive Server Anywhere 6.01 patch (formerly SQL Anywhere)
- Infomaker 6.5

### 3.2 HARDWARE CONFIGURATION

Large facilities that process a high volume of providers will require a client-server. The minimum specifications for these sites are:

<b>Server – Y2K compliant hardware</b> Windows NT 4.0, Service Pack 3 Sybase Adaptive Server Anywhere 6.0 Sybase Adaptive Server Anywhere 6.01 patch 586 or higher CPU 64 MB RAM 100 - 200 MB available disk space Uninterruptible Power Source (UPS) Tape Backup Unit	<b>Client Workstation – Y2K compliant hardware</b> Windows NT 3.5.1/4.0 Windows 95 or 3.11 Sybase Adaptive Server Anywhere 6.0 Sybase Adaptive Server Anywhere 6.01 patch Infomaker 6.5 486 or higher CPU 16 MB RAM or Higher E-Mail account or Modem (9600 Baud or higher) 30 - 50 MB available disk space
--	--

The client workstation minimum disk space requirement is 75MB for a stand-alone site.

The minimum specifications for the service specific server and central server and central e-mail server are:

<b>Server – Y2K compliant hardware</b> Windows NT 4.0, Service Pack 3 Sybase Adaptive Server Anywhere 6.0 Sybase Adaptive Server Anywhere 6.01 patch Pentium Processor or higher 128 MB RAM 1.0 GB disk space Uninterruptible Power Source (UPS) Tape Backup Unit	<b>Central E-mail Server</b>
